

Papers are Done, but the Party's Not Gone!

The general submission period for **abstracts and manuscripts** has officially come to an end. We sincerely thank everyone who submitted their work!

⚠ Please note

While the [Indico system](#) may technically remain open, any **new submissions to the “Session Talks” track will be automatically declined**. We kindly ask you **not to submit materials** through the system at this stage.

If you believe your case deserves individual consideration, feel free to **contact the organizing committee via email** – we'll do our best to review special requests on a case-by-case basis.

👏 But here's the good news!

Young researchers still have a chance to shine:

The “Lightning Talks” Track is open until June 15!

If you're an early-career scientist or student with something exciting to share, this is your moment. Submit your abstract, grab the spotlight, and join the scientific conversation!

Peer Review Jam, not a Scam!

We're thrilled with your incredible engagement – the number of submitted abstracts and manuscripts exceeded all expectations!

Given the extended submission window and the volume of high-quality contributions, we need just a bit more time to carefully review everything. As a result, **we're adjusting the timeline** for the next steps in the process:

📧 **Acceptance Notification** – now scheduled for **30 June**

📷 **Camera-Ready Submission** – extended to **15 July**

📅 **Registration & Fee Payment** – will run from **16 July to 20 August**

We appreciate your understanding and enthusiasm. Your contributions are what make this conference vibrant and meaningful — thank you for being part of it! 💎

Big Reminder: The ATR Challenge!

Get ready, scientists, researchers, engineers, and AI fans!

This is your chance to team up and solve real-world automatic object recognition puzzles. Show off your skills, compete with the best, and grab those awesome prizes!

🎤 🏆 🎉 Final pitches and celebrations await YOU at PRIP2025!

🚀 How to Join?

- 1 Register your team on www.atrdata.cn
- 2 Develop your solution using provided datasets
- 3 Submit & compete (6 attempts allowed!)
